(54) CONVERSATION TYPE DATA PROCESSING SYSTEM

(57)Abstract:

PURPOSE: To shorten processing time by inhibiting conversion from working data into execution data, the storage of data in a data file and the erasing of the working data with respect to a specified data file even when the processing of the data specified by a user is ended.

CONSTITUTION: When the user specifies a specific data file 24 and uses a resident declaration command, conversion from working data into execution data, the storage of data in the specified data file 24 and the erasing of the working data 21 are inhibited even when the processing of the specified data file 24 is ended. When the data file 24 to be repeatedly used in a series of processing is specified, storage in the data file 24 and development to the working data 21 may be applied only once without frequently executing these processing. Thus, the processing time can be shortened.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
